DETAILED ACTION

Applicant's arguments filed 4/2/04, with respect to the rejection(s) of claim(s) under 35 USC 102(b) and 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. Applicants are correct in that a material susceptible to termite infestation is required in instant invention. None of the cited references meet this limitation. However, upon further consideration, a new ground(s) of rejection is made in view of arguments below.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "substantially more" in claim 1 line 6 is a relative phrase which renders the claim indefinite. The phrase "substantially more" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. What is meant by "substantially more"?

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164

Art Unit: 1616

USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 9-21, 28, 29 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11, 13-22, 24, 34, 46 of copending Application No. US 2003/0073748; 4/17/03.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of both applications are to a composition / barrier comprising nooktatone, zizanol, or bicyclovetivenol plus a substrate material (wood building materials – mulch, soil, or diatomaceous earth). Note that the concentration of nooktatone, zizanol, or bicyclovetivenol in wood material is the same for both inventions and the environment in which both inventions is to be used is the same; therefore, the instant invention is made obvious over US 2003/ '378. Note that both ants and termites are insects; therefore, US2003/ '378 method of controlling ants would also control termites since the same amount of active is being used in the same environment.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
